

I benefit from listening to XM radio - I pay for the privilege of using this service and enjoy having the variety and quality that one cannot get from the offerings of the National Association of Broadcasters - I do not feel I should be obligated to listen to just what they (the NAB) have decided I should have available to me. I respectfully urge you to reject the NAB's petition 04-160 and for you to support XM radio's ability to provide the kind of programming I want to receive.
